Partnership**
for Effective Development
Co-operation

Enhanced Effectiveness at Country Level

15th Steering Committee Meeting
21 April 2018
Washington, D.C.

2017-2018 Work Programme Strategic Output 1

Activity 1.1
Country-led dialogue to advance effectiveness principles

Activity 1.2
Strategies to manage diverse development co-operation

Activity 1.3
National multi-stakeholder dialogue platforms

Activity 1.4
Launching a Global Compendium of Good Practices

Implementation Progress Achieved

Mapping of Country Experiences

- National development co-operation policies
- National development co-operation strategies
- Multi-stakeholder engagement platforms
- Government-owned data collection systems
- Mutual accountability frameworks

Selection of Pilot Countries

- Original mapping resulted in long-list of over 40 countries
 - Solicited feedback from Working Group participants
 - A shortlist of 10 countries was proposed
 - These countries were asked to confirm interest in participating as a pilot
-

Global Partnership

Pilot Countries

Key Results of the Pilot Launch Workshop

Common Challenges Identified

Strengthening coordination and dialogue mechanisms

Collecting, managing and using development co-operation data

Engaging civil society, local governments and private sector

Building the capacity of various stakeholder groups

Understanding and managing diverse finance flows

The Way Forward Agreed

The focus of each pilot will be based on specific country effectiveness challenges and needs.

A common reference framework will be used to ensure consistency and comparability across pilots.

A range of stakeholders, including Global Partnership Initiatives, will participate in implementation.

Pilot results will be a source of evidence for the Global Compendium of Good Practices.

Focus Areas of Country Pilots

Bangladesh

Strengthening national coordination structures, with a focus on engaging the private sector and enhancing ownership of co-operation flows.

Cambodia

Enhancing systems for managing developing co-operation, including better capturing South-South Co-operation

El Salvador

Evaluating the current development co-operation framework and identifying key challenges to inform the development of a successor.

Georgia

Mapping of various existing coordination structures and analysis of key challenges to support consolidation and strengthening.

Kenya

Strengthening coordination systems to include the private sector and foundations and to support dialogue between national and sub-national governments.

Lao People's Democratic Republic

Mapping of availability and focus of government and development co-operation resources and better understanding Triangular Co-operation.

Malawi

Reviewing the development co-operation strategy and support to the formulation of a successor, as well as capacity building for various stakeholders.

Mexico

Incentivising reporting to country information management systems and better understanding key data points to measure of the effectiveness of South-South Cooperation.

Rwanda

Analysing the blended finance landscape and applicability blended finance principles in country, and proposing criteria to review blended finance opportunities.

Uganda

Conducting an independent review of existing partnership architecture and facilitating multi-stakeholder dialogue on results.

The Global Compendium of Good Practices

Providing Guidance

The Global Compendium will provide guidance to governments and their partners on the implementation of effectiveness commitments at country level.

Collecting Evidence

Global Partnership stakeholders will be invited to submit complementary evidence on tested solutions to inform the Global Compendium.

Identifying Challenges

Pressing and persistent challenges will be identified and agreed for inclusion in the Global Compendium.

Finding Synergies

Pressing and persistent challenges will be identified and agreed for inclusion in the Global Compendium.

Actionable Solutions

The Global Compendium will be structured around these common effectiveness challenges, followed by proposed solutions.

Adding Value

The Global Compendium will aggregate existing evidence with new evidence generated through country pilots, providing a one-stop shop for guidance on addressing common effectiveness challenges.
