Saint Lucia is an upper middle-income country and a Small Island Development State (SIDS) with a GNI of 8,830 USD per capita (2017) and a population of 180,000 inhabitants (2017). In the 2018 Monitoring Round, Saint Lucia reported on 29 million USD in development co-operation flows.

1. National development planning and results orientation

Overall quality of national results framework
High-quality, inclusive and results-oriented development strategies are critical for countries’ ownership over their development and the implementation of the 2030 Agenda and the Sustainable Development Goals (SDGs). The quality of national development planning in Saint Lucia is high (81%).

Extent of use of country-owned results frameworks by development partners
Development partner alignment to country-led development priorities is at the heart of country ownership. Global Partnership monitoring assesses whether interventions: draw objectives from national development strategies; draw indicators from country results frameworks; use government data and statistics for monitoring; and involve government in evaluations. The first three elements provide the official data to report on SDG indicator 17.15.1. In Saint Lucia, development partners align to country priorities to a low extent (50% - SDG indicator 17.15.1).

The national development strategy and results framework...
- ...defines priorities, targets and indicators: YES
- ...includes budget or costing information: YES
- ...aligns to SDGs: YES
- Regular progress reports are available: YES

SDG 17.15.1
- Objectives: 78% - YES
- Indicators: 50% - YES
- Data: 53% - YES
- Joint evaluations: 29% - YES

2. Multi-stakeholder engagement

Recognising that successful development efforts require the inclusive and equitable participation of all actors, the 2030 Agenda calls for collective action by the whole of society. Global Partnership monitoring examines the engagement of civil society and the private sector from both the perspective of the government and representatives of these stakeholder groups.

Quality of public-private dialogue
In the 2018 Monitoring Round, government representatives and representatives of large firms, SMEs and trade unions in Saint Lucia did not assess the quality of public-private dialogue.

Enabling environment for civil society organisations...
- ...was not assessed by government representatives, civil society organisations and development partners in the 2018 Monitoring Round in Saint Lucia.

Major development partners in the 2018 Monitoring Round (by reported disbursements in 2017)
- CARIBBEAN DEVELOPMENT BANK: 40%
- EU INSTITUTIONS: 29%
- JAPAN: 15%
3. Quality and use of public financial management systems

Strengthening public financial management systems

Strong public financial management (PFM) systems are an essential element of good governance and vital to achieving development goals. Saint Lucia did not assess progress in the quality of its PFM systems.

Development partners’ use of country systems

Development partners’ use of these systems to deliver co-operation both lowers transaction costs but also helps to accelerate their strengthening. In Saint Lucia, use of country PFM systems was reported to be 14% in 2018. The share of development co-operation recorded on budgets subject to parliamentary scrutiny was reported at 88% in 2018.

Overall use of country systems

- 14% in place
- 28% not in place

Disbursements as scheduled

- 71% of co-operation disbursed as scheduled
- 91% of co-operation available in forward looking expenditure plans for the next three years

4. Predictability and forward planning

High-quality and timely information on development co-operation helps governments in planning and managing resources for results and can guide development partners in coordinating their support with other providers, as to avoid fragmentation and duplication of efforts. Annual predictability of development co-operation is low, with 71% of co-operation disbursed as scheduled. Medium-term predictability is low, with 38% of co-operation available in forward looking expenditure plans for the next three years.

Predictability of development co-operation

- Disbursements as scheduled
  - 71% Saint Lucia
  - 91% SIDS

5. Mutual accountability mechanisms

Mutual accountability underpins the efforts of development actors to meet joint commitments, improve how they work together and increase their development effectiveness. Mutual accountability mechanisms are made up of multiple, reinforcing components that can help enhance transparency and accountability at country level. Global Partnership monitoring defines and assesses mutual accountability against five components. Saint Lucia has zero out of five components in place.

- Component 1: Comprehensive policy framework for development co-operation
  - In place
- Component 2: Country-level targets for government and development partners
  - Not in place
- Component 3: Regular joint assessment of progress
  - In place
- Component 4: Assessments are inclusive and involve non-state actors
  - Not in place
- Component 5: Timely, publicly available results of assessments
  - In place

Adequate and effective financing is essential to achieve gender equality and to empower all women and girls. Saint Lucia has some elements of a system in place to track and make public allocations for gender equality and women’s empowerment, approaching the requirements of SDG indicator 5.c.1.

- SDG 5.c.1
  - 95% of development partners report through one or more of these systems

- AIMS: Aid Information Management System
  - In place
- DMS: Debt Management System
  - In place
- FMIS: Financial Management Information Systems
  - Not in place
- Other: Excel-based systems or similar
  - Not in place
